

General Hardware

Full details and safety information about our range of general hardware

Applications

General hardware items, such as carbine hooks and quick links, are suitable for many different applications in various market segments such as agriculture, industry, transportation, etc.

Range

George Taylor offers a wide range of general hardware products to complement the main range.

- Carbine hooks
- Quick links
- Recessed links
- G hooks
- Viking links
- Straining screws
- Split pins

Design

General hardware products are designed for multiple purpose usage.

Finish

General hardware products can vary in finish, from painted to electro galvanised. Specific details can be found on each product page.

Certification

General hardware products are not to be used for lifting. These products can be supplied with a 2.1 certificate.

Instructions for use

Items should be inspected before use to ensure that they are free from nicks, gouges and cracks.

Also:

- The item should not be used for lifting - general hardware items are not suitable for lifting applications.
- Never modify, repair or reshape an item by machining, welding, heating or bending, as this may affect its performance.

The products must be regularly inspected in accordance with the safety standards and regulations given in the country of use.

This is required because the products in use may be affected by issues such as wear & tear and misuse, which may lead to deformation and alteration of the material structure.

Inspection should take place at least every six months (follow the local rules in the country of use) and more frequently when the products are used in severe operating conditions.

Unit 4, Fryers Road, WS2 7LZ.
